

React – Ex – Components Communication

Create a child component with “Name”, “Age”, “City”, “Is Adult” fields and a button as follows :

Parent Component

- Avi is 23 years old, lives in TLV and He is an Adult
- Dana is 42 years old, lives in Haifa and He is not an Adult

Child Component

Name :

Age :

city :

Is Adult : ☐

A button click will pass the data to it's parent and will be added to a list
