

React – HW – Props & State

Ex1

There are 3 components as follows :

A text that was entered in a text box in Comp A will be presented in Comp C

Ex2

Create a parent comp with fields for entering data about a new product:

- Text box to a product name
- Text box to a product price
- Text box to a product color
- A “save” button for saving the product data
- A “show products” button for creating a table with the products data in a Child component
