React – Ex – Redux

Implement the following :

Users

ID : 3
First Name : Ron
Last Name : Hadad
Age : 41

Add   Update   Delete

All users :

1	Avi	Cohen	23
2	Dana	Levy	15
3	Ron	Hadad	41

Adult users :

1	Avi	Cohen	23
3	Ron	Hadad	41

Create a component called "User" with the following :

Text Box for "ID"

Text Box for "First Name"

Text Box for "Last Name"

Text Box for "Age"

A "Add" button – Will add a new user to the store

A "Edit" button – Will update the user with the given data in the store

A "Delete" button – Will delete the user data by the given id from the store

- Create a child component that presents ALL the users in a table
- Create a grandchild component that present ONLY adult (age>18) users in a table
